**NPI**  
INTERNATIONAL  
Water storage

KNOW MORE

• OVER 65 YEARS' EXPERIENCE • CERTIFIED QUALITY • WORLDWIDE SERVICE •

## WE ARE KNOWN FOR OUR TECHNICAL EXPERTISE.

As a result, we have grown to become the market leader in the field of water storage. Our core business includes supplying high-quality coated steel silos all over the world. In this division, we offer water storage solutions for the horticulture sector and many other applications and markets. We supply local markets around the world through our extensive and ever-expanding network of distributors.

## MARKET LEADER IN WATER STORAGE

Over the last decade, NPI has grown to become an international market leader in water storage systems. We have used our know-how to become specialists in modular metal silos with high-quality coatings. We produce these water storage solutions for the horticultural sector and many other applications and markets. These include drinking water storage, rainwater storage, fish farms and manure storage.

## WATER STORAGE TANKS

Ensuring the availability of safe, clean drinking water is an increasingly important issue around the world. So it's no coincidence that the popularity of our metal water tanks has grown enormously in recent years. This type of tank is multifunctional and has several important advantages. These include the storage of large volumes of water, easy installation and efficient transport. Our tanks are made to measure and can be manufactured and finished in various ways, with a number of optional extras.

## OTHER STORAGE SYSTEMS

As one of the oldest film manufacturers, NPI also supplies silo linings for other types of water storage systems. The various specially developed films have been successfully used to coat excavated tanks all over the world. Recently, we have also started supplying flexible water tanks. In short: with a wide variety of films and systems, NPI always has a storage system to suit your specific objectives.

### WHO ARE WE?

Whether it's irrigation water for your crops, agriculture, aquaculture, process water, slurry storage, emergency water or drinking water: NPI has a solution.

At NPI we specialise in water storage solutions, producing and exporting metal tanks and excavated basins all over the world. With our 65 years of experience, minds and hands combining 150 years of reliability, thousands of our water tanks have found their way into the horticulture, aquaculture, livestock and poultry sectors around the world.

### LONG-LASTING, CERTIFIED QUALITY WATER STORAGE SOLUTIONS

Not only is the quality of your water important, but the system must also be safe. Both for you and your products. With our in-depth knowledge of the aquaculture market and the most comprehensive certification package for plastic film processing, we know how to fulfil the highest quality requirements. As such, all our coating materials are suitable for contact with consumer products. The materials do not release any substances into the water that could pollute it. What's more, all our tanks are designed with a strength at least 40 per cent higher than that required for water storage.

Our customers don't have to worry about their water storage system and can concentrate on production, as they benefit from a water tank with a long service life and low maintenance.
